

## YETI RAMBLER BOTTLES - GOOD TO KNOW

### ARE THE CAPS INTERCHANGEABLE?

Yes, all YETI Rambler® Bottle Caps fit each bottle, making these reusable water bottles even more versatile. This includes the Rambler Bottle MagDock™ Cap, HotShot™ Cap, Cup Cap, Chug Cap, and the Bottle Straw Cap. Browse the range of bottle caps among the other Rambler Accessories.

### WILL IT FIT IN MY CUPHOLDERS?

You may find Yeti Rambler bottles to be too big for most cupholders. Check out YETI Rambler Tumblers for cupholder-compatible options.

### IS IT DISHWASHER SAFE?

Yes. We recommend lids on the top rack, and gaskets in the utensil's basket. Of course, you can always hand wash, but we know you're busy on your next adventure.

### CAN I USE THE WATER BOTTLE FOR HOT AND COLD DRINKS?

Yes – vacuum insulation in these Yeti Rambler® Bottles will keep cold drinks cold and hot drinks hot. Do not use these bottles with carbonated beverages or for storage of food or perishables.

### IS THERE A MAXIMUM TEMPERATURE LIMIT FOR HOT LIQUIDS WHEN USING THE RAMBLERS OR RAMBLER LIDS?

Yes, we recommend temperatures to not exceed the limits below when using the following Rambler drinkware items and lids. Our Ramblers lock in hot temperatures, so please, always open carefully. Do not overfill. Hot liquids must remain below the solid ring located beneath the threads. Keep hot liquids out of reach of children. Maximum Temperature of 85C (185F)

Rambler Tumbler Standard Lid, Rambler Tumbler Magslider Lid , Rambler Bottle HotShot Cap, Rambler Bottle Cup Cap, Rambler Jug Lid & Cap, Rambler Bottle Chug Cap, Rambler Bottle MagDock Cap

**NOT Intended for Use with Hot Beverages**

Rambler Tumbler Straw Lid, Rambler Bottle Straw Cap , Rambler Bottle TripleHaul Cap

### WILL MY RAMBLER LEAVE A WET RING ON SURFACES

No, YETI Ramblers are over-engineered, 18/8 stainless Tumblers, Bottles, and Colsters®, designed with double-wall vacuum insulation and a No Sweat™ Design.

### RAMBLER JR. KIDS BOTTLES

Do not use the Rambler® Jr. 12 oz Kids Bottle with hot, carbonated, pulpy or perishable beverages. Over time, food and liquid can cause pressure to build inside the bottle. If pressure buildup occurs, the cap can be difficult to remove; or forcefully eject and cause injury.

1/2 Gallon Jug & 1 Gallon Jug
