

Materials

EPS Core range:

EPS cores are rigid, lightweight to allow everyone to get involved with the Manta passion - delivering great bodyboarding experiences. Perfect for everyone to get started. Up to 45"

Manta Viper, Manta Sabre, Manta Sonic, Manta Dart, Alien

PE Core range:

Polyethylene cores offer a responsive surfing experience with more manoeuvre-based riding and carving through the waves. If you want to really experience bodyboarding and take on bigger waves, starting here is the answer.

Manta Phantom; Manta Drive

BPP Core range:

High performance, lightweight, rigid and responsive. Beaded polypropylene cores are the signature bodyboard experience. BPP cores work with you to improve performance in all conditions – lightweight/responsive/superb memory. Start or finish here. Experience the best materials in bodyboarding.

Manta Black; Manta ProXT; Manta Force

User information

- Do wash the board in clean water after each surf
- Do keep your board in a cool, dry and shady place
- Do use a Manta Board Bag to protect your Manta bodyboard

In use you should avoid the following:

- Don't expose your board to excessive heat
- Don't leave your board in or on your car on a hot day
- Don't leave your board in direct sunlight or on hot sand
- Don't over flex your board

- Don't use your board as a skim board
- Don't ride your board onto rocks, reef or the shore
